His duties as an officer have evolved to the capabilities of Mrs. Catherine A. Spackman, CMA, Treasurer and Mrs. Teresa E. Poper, Assistant Treasurer.

FINANCIAL REVIEW

Results of Operations – Change in Net Assets

The \$0.19 or 5.4% decrease in net assets per Class A share expressed in U.S. dollar terms during the past nine months was due primarily to the 11.1% decrease in the price of silver during the period. The 0.5% increase in the price of gold was offset by the net loss during the period. Net assets per Class A share as expressed in Canadian dollar terms decreased by \$0.29, or 5.4%, as the changes described above were not affected by the 0.2% increase in the U.S. dollar relative to the Canadian dollar. The components of the change in net asset value per Class A share in U.S. and Canadian dollars are summarized in the adjacent table.

Results of Operations – Net Loss

The net loss for the nine months ended July 31, 2001 is comparable to that of the same period in 2000. Interest income declined during the period due to lower balances of interest bearing cash deposits. Operating expenses fell by 4.5% in the nine months ended July 31, 2001 as compared to the same period in 2000. After removing the impact of the foreign currency exchange loss (gain in 2000), operating expenses were 7.0% lower. Administration fees declined as a result of a lower level of net assets over the first nine months of the year from those which existed during the same period last year. For the same reason, anticipated income taxes are lower.

Central Fund did not sell any of its gold and silver bullion holdings during either of these periods.

Liquidity and Capital Resources

Central Fund's dollar liquidity objective is to hold cash reserves primarily for the payment of operating expenses, taxes and Class A share dividends. Should Central Fund not have sufficient cash to meet its needs, a nominal portion of Central Fund's bullion holdings may be sold to fund tax and dividend payments, provide working capital, and pay for redemptions of Class A shares (if any). Sales of such holdings could result in Central Fund realizing capital gains or in the current bullion market, losses. Central Fund qualifies as a "Mutual Fund Corporation" for Canadian income tax purposes. Any Canadian tax payable by Central Fund to the extent it relates to taxable capital gains, is fully refundable when the realized gains are distributed by way of special capital gains dividends or deemed to be distributed to shareholders through redemptions of Class A shares.

For the nine months ended July 31, 2001, Central Fund's cash reserves decreased by \$688,000 as amounts were used to pay operating expenses, taxes and the Class A share dividend. Management monitors Central Fund's cash position with an emphasis on maintaining its mandate to hold maximum amounts of gold and silver bullion.

- In 1985 the shareholders authorized the use of contributed surplus to eliminate any deficit that may arise from losses and on the payment of the Class A shares' stated dividend. Accordingly, \$466,807 (2000, \$461,460) has been transferred from contributed surplus on July 31, 2001 and 2000 representing the net loss for the nine months then ended. This change did not affect the net asset value of the Company.
- Effective November 1, 2000, the Company adopted the new recommendations of The Canadian Institute of Chartered

- Under Canadian generally accepted accounting principles, the Company records the unrealized appreciation (depreciation) of its investments as a component of shareholders' equity. Under accounting principles generally accepted for investment companies in the United States, these amounts are reflected in the statements of loss. Net loss for the nine months ending July 31, 2001 would be \$3,753,109; (2000, \$4,506,488) under United States principles.
