

# Central Fund of Canada Limited

## 3rd Quarter

### INTERIM REPORT TO SHAREHOLDERS

*for the nine months ended July 31, 2007*

*Central Fund of Canada Limited*

## **The Role of Central Fund**

**To serve investors as "The Sound Monetary Fund".  
To hold gold and silver bullion on a secure basis for the  
convenience of investors in the shares of Central Fund.**

**Investment Policies & Restrictions** The governing articles of Central Fund require that at least 75% of Central Fund's non-cash assets be invested in gold and silver bullion. This cannot be changed without shareholder approval.

The stated investment policy of the Board of Directors requires Central Fund to maintain a minimum of 90% of its net assets in gold and silver bullion of which at least 85% must be in physical form. On July 31, 2007, 98% of Central Fund's net assets were invested in gold and silver bullion. Of this bullion, 99.3% was in physical form and 0.7% was in certificate form.

Central Fund's physical gold and silver bullion holdings may not be loaned, subjected to options or otherwise encumbered in any way.

**Safeguards** Central Fund's bullion is stored on a fully segregated basis in the underground vaults of the Canadian Imperial Bank of Commerce, one of the largest banks in North America in terms of total assets.

The Bank may only release Central Fund's physical bullion holdings upon receipt of an authorizing resolution of Central Fund's Board of Directors.

Insurance is carried on the physical gold and silver bullion holdings against destruction, disappearance or wrongful abstraction.

Bullion holdings and bank vault security are inspected twice annually by directors and/or officers of Central Fund. On every occasion, inspections are required to be performed in the presence of both Central Fund's external auditors and bank personnel.

Central Fund is subject to the extensive regulations and reporting requirements of the United States Securities and Exchange Commission, two stock exchanges and most Canadian provincial securities regulatory authorities.

**Conveniences** Central Fund's Class A shares are listed on the American Stock Exchange (CEF) and on the Toronto Stock Exchange (CEF.A in Canadian dollars and CEF.U in U.S. dollars). Making a gold and silver bullion investment through Central Fund is as easy as calling one's stockbroker or investment dealer.

The stock exchange listings provide readily quoted, liquid markets for the Class A shares of Central Fund. The bid/ask spread is considerably less than the buying and selling prices of outright bullion purchases, especially for small transactions.

Unlike many other forms of bullion investment, there are no ownership costs paid directly by the investor. All expenses of handling, storage and insurance of bullion are paid by Central Fund. As well, there are no bullion assay charges to the shareholder upon the sale, redemption or liquidation of the Class A shares of Central Fund.

## Third Quarter Report

Central Fund is currently 98% invested in gold and silver bullion. At July 31, 2007 Central Fund's gold holdings were 727,031 fine ounces of physical bullion and 5,685 fine ounces of gold bullion certificates for a total of 732,716 fine ounces. Silver holdings were 36,384,482 ounces of physical bullion and 245,572 ounces of silver bullion certificates for a total of 36,630,054 ounces. Insurance is carried on the physical bullion which is held in safekeeping by a Canadian chartered bank in segregated vault storage. Central Fund continues to fulfill its mandate as "The Sound Monetary Fund".

Senior executive officers have ensured that there are disclosure controls and procedures that provide reasonable assurance that material information relating to the Corporation is disclosed on a timely basis. They believe these disclosure controls and procedures have been effective during the nine months ended July 31, 2007.

On December 8, 2006, the Company, through a public offering, issued 8,640,000 Class A

shares for proceeds of \$77,967,360 net of underwriting fees of \$3,248,640. Costs relating to this public offering were approximately \$600,000 and net proceeds were approximately \$77,367,360.

The Company used the net proceeds from this public offering to purchase 52,690 fine ounces of gold at a cost of \$33,932,360 and 2,634,540 ounces of silver at a cost of \$36,817,696, both in physical bar form. It is party to an Administration and Consulting Agreement with The Central Group Alberta Ltd., which is related to the Company through four of its officers and directors. The Central Group Alberta Ltd., which acts as Administrator, has operating offices with employees, advisors and consultants who provide administration and consulting services to the Company. For such services, the Company pays an administration and consulting fee, payable monthly (see note 6 to the financial statements).

#### Results of Operations – Change in Net Assets

Net assets decreased by \$30.1 million in the third quarter essentially due to the unrealized depreciation of holdings during the quarter. However, assets increased by \$144.4 million during the nine months ending July 31, 2007 as a result of the December 8, 2006 public offering as well as unrealized appreciation of holdings during the period.

The following table summarizes the quarterly financial information:

#### Financial Results – Net Income

Central Fund's earned income objective is secondary to its investment objective of holding almost all of its net assets in gold and silver bullion. Generally, Central Fund only seeks to maintain adequate cash reserves to enable it to pay expenses, taxes if applicable and Class A share dividends. Because the holdings of gold and silver bullion are not loaned to generate income, Central Fund's realized income is a miniscule percentage of its net assets. However, CICA Accounting Guideline 18 (Investment Companies) requires Central Fund to record unrealized appreciation (depreciation) of holdings in income.

A net loss (inclusive of unrealized depreciation of holdings) of \$30.1 million occurred in the third quarter compared to a higher net loss of \$42.9 million for the corresponding quarter in the prior year. For the nine months ended July 31, 2007, the net income (inclusive of unrealized appreciation of holdings) was \$66.9 million compared to \$210.9 million for the same period in 2006. For both the three and nine month periods, the loss or income was virtually all due to unrealized depreciation or appreciation of holdings, as applicable. Certain expenses, such as administration fees which are scaled, have varied in proportion to net asset levels, or, in the case of stock exchange fees, with market capitalization based on the number of Class A shares issued. Safekeeping fees and bullion insurance costs increased, reflecting the added ounces and higher prices of gold and silver bullion. Administration fees increased to \$1,876,888 from \$1,461,830 for the nine months based on the increased assets under administration.

Expenses (which exclude taxes) as a percentage of average month-end net assets for the nine-month period ended July 31, 2007 were 0.33%, compared to 0.36% for the same nine-month period in 2006. For the twelve months ended July 31, 2007, the expense ratio was 0.44% compared to 0.49% for the prior twelve-month period.

#### Liquidity and Capital Resources

All Central Fund's assets are liquid. The Company's objective is to hold cash reserves that generate some income primarily to be applied to pay expenses and Class A share dividends. The ability of Central Fund to have sufficient cash for expenses and dividend payments, and to meet demands for redemption (if any), is primarily dependent upon its ability to realize cash flow from its cash equivalents. Should Central Fund not have sufficient cash to meet its needs, portions of Central Fund's bullion holdings may be sold to fund dividend payments, provide working capital and pay for redemptions (if any) of Class A shares.

For the nine months ended July 31, 2007, Central Fund's cash reserves increased by \$3,514,858 to \$20,151,445. This increase was a result of the cash portion retained from the proceeds of the public offering completed in December 2006, offset by amounts used to pay expenses and the Class A share dividend. The Administrator and senior officers monitor Central Fund's cash position with an emphasis on maintaining its mandate to hold maximum amounts of gold and silver bullion.

#### Forward-looking Observations

Changes in the market prices of gold and silver impact the net asset value per Class A share. Assuming as a constant exchange rate the rate which existed on July 31, 2007 of Cdn. \$1.0657 for each U.S. dollar together with the holdings of gold and silver bullion which existed on that date, a 10% change in the price of gold would increase or decrease the net asset value per share by approximately \$0.43 per share or Cdn. \$0.46 per share. A 10% change in the price of silver would increase or decrease the net asset value per share by approximately \$0.42 per share or Cdn. \$0.45 per share. If both gold and silver prices were to change by 10% simultaneously in the same direction, the net asset value per share would increase or decrease by approximately \$0.85 per share or Cdn. \$0.91 per share.

This MD&A is dated August 20, 2007. Additional information relating to the Company, including its Annual Information Form, is available on the SEDAR website at [www.sedar.com](http://www.sedar.com).
